

WG-522W BEE-TOUGH

The Wonder Grip® WG-522W Bee-Tough combines Bee-series™ knitting technique and a nitrile coating providing oil-resistance and an optimal long-lasting grip. The upper part of the gloves is made of an ultralightweight liner offering both high resistance to torsion and unmatched breathability. Bee-series™ knitting technique creates a unique shape on the palm maximizing the coefficient of friction delivered by the coating itself. The low part of the glove benefits from the DualLiner™ technology and its special support on the back of the hand ensuring a snug and secure fit. Features with Bee-series™, DualLiner™ and a nitrile coating, WG-522W Bee-Tough sets a new standard for comfort at work, in a greasy and oily environment.

KEY FEATURES

- ✓ Ultra-lightweight liner offering both high resistance to torsion and unmatched breathability
- ✓ Knitting technique creating a unique shape on the palm and maximizing grip
- ✓ High grip performance for safe handling in dry-to-oily environments
- ✓ Soft coating, enhancing hand movement for superior dexterity and reduced muscular fatigue

TYPE OF PROTECTION

- General purpose
- Heat resistance

APPLICATIONS

- Warehousing-packing-and-logistics
- Assembly
- Construction-and-public-works
