

WG-538 FREEZE FLEX PLUS

WG-538 Freeze Flex Plus is the latest innovation in cold-resistant hand protection from Wonder Grip. It is a fully double coated cold-resistant glove (contact cold performance level 2: keeping your hands warm down to -20 °C). Using a specifically developed innovative nitrile coating, SZNT™ WG-538 Freeze Flex Plus remains flexible and comfortable to use in below freezing conditions, while ensuring ultimate abrasion resistance.

KEY FEATURES

- ✓ Made of two layers of soft acrylic, the aerated liner keeps the heat released by the wearer inside the glove, eliminating heat loss due to the convection process.
- ✓ Robust yet relatively thin coating, providing improved dexterity and flexibility, thus outmatching similar products
- ✓ Proprietary nitrile coating developed to guarantee very good flexibility even in sub-zero temperatures
- ✓ Cold-resistant and liquid-repellent for working in challenging environments, offering a comfortable tactile sensation and improved grip

TYPE OF PROTECTION

- Liquids
- Cold resistance
- Industrial oils

APPLICATIONS

- Construction-and-public-works
- Food industry
- Waste management
- Public authorities
- Warehousing-packing-and-logistics

NORMS AND CERTIFICATIONS

EN 388

EN511
