

WG-733+ DEXCUT®

The Wonder Grip® WG-733+ Dexcut® is designed for heavy-duty applications where medium to heavy cut hazards and liquid projections are a constant risk. Certified to ISO 13997 level D and ANSI/ISEA 105 level A4, it provides advanced cut protection while maintaining comfort, flexibility, and long-lasting performance in demanding industrial environments.

Enhanced with a 3/4 back coating, the WG-733+ Dexcut® offers superior protection against accidental splashes and liquid projections, ensuring the back of the hand remains shielded without compromising breathability. Its HDML™ coating delivers a secure non-slip grip, exceptional abrasion resistance, and double protection against thermal risks, making it reliable in dry and slightly greasy conditions.

The Wonder Grip® WG-733+ Dexcut® stands out as a comprehensive safety solution, combining high cut resistance with extended liquid protection. It is the ideal glove for professionals seeking uncompromising performance and confidence when tackling the most demanding semi-dry environments.

KEY FEATURES

- ✓ Soft yet robust technical liner, engineered to offer protection against the cold and heat, as well as cut level A4/D protection
- ✓ Exceptional anti-wear properties and 3/4 back coating designed to protect the knuckles and fingers
- ✓ Extremely durable latex coating with increased resistance around the thumb for extended use
- ✓ Designed to reproduce the natural shape of the hand, for ease of movement and continuous wear

TYPE OF PROTECTION

- Heat resistance
- Cold resistance
- Cut resistance

APPLICATIONS

- Construction and public works
- Metallurgy
- Public authorities
- Waste management
